

УДК 012 Мотавкин

**БИБЛИОГРАФИЯ ЖУРНАЛЬНЫХ СТАТЕЙ П.А. МОТАВКИНА, ДЕПОНИРОВАННЫХ НАЦИОНАЛЬНОЙ МЕДИЦИНСКОЙ БИБЛИОТЕКОЙ США\***

По состоянию на май 2011 г. в базе данных PubMed было индексировано 105 статей профессора П.А. Мотавкина. Многие из приведенных в этом списке работ могут быть полезны для научных работников медицинских и биологических специальностей.

**1959**

- Relation of sciatic nerve injuries to changes in the lumbar and sacral spinal ganglia. *Motavkin P.A.* Arkh Patol. 1959; 21 (1). P. 34–44.

**1961**

- On so-called neurosymplasts or syncytial cellular formations in sensory intervertebral cranial ganglia. *Motavkin P.A.* Arkh Patol. 1961; 23 (10). P. 42–46.

**1964**

- Innervation of the blood vessels of the spinal cord. *Motavkin P.A.* Arkh Anat Gistol Embriol. 1964; 46. P. 56–64.

**1965**

- Innervation of spinal cord blood vessels. *Motavkin P.A.* Fed Proc Transl Suppl. 1965; 24 (5). P. 804–808.

**1968**

- Afferent innervation of the arteries in the medulla oblongata. *Motavkin P.A., Tikhvinskaia B.T.* Arkh Anat Gistol Embriol. 1968; 55 (10). P. 69–74.

- Tween-esterase in sensory and motor neurons in the rabbit. *Motavkin P.A., Kononova T.A.* Dokl Akad Nauk SSSR. 1968; 182 (5). P. 1212–1214.

**1969**

- Incapsulated receptors of the medulla oblongata and spinal cord arteries. *Motavkin P.A., Tikhvinskaia B.T.* Bull Exp Biol Med. 1969; 67 (1). P. 84–87.

- Characteristic nerves of the human spinal cord. *Motavkin P.A., Belikov A.A.* Arkh Anat Gistol Embriol. 1969; 57 (12). P. 66–71.

**1970**

- Cholinergic nervous apparatus of pia mater and brain blood vessels. *Motavkin P.A., Dovbysh T.V.* Bull Exp Biol Med. 1970; 70 (7). P. 113–136.

**1971**

- Histochemical characteristics of acetylcholinesterase of the nerves innervating the brain vessels. *Motavkin P.A., Dovbysh T.V.* Acta Morphol Acad Sci Hung. 1971; 19 (2). P. 159–173.

- Fluorescence microscopic evaluation of the state of RNA of protoneurons under conditions of retrograde reaction. *Motavkin P.A., Baranov V.F.* Arkh Anat Gistol Embriol. 1971; 61 (7). P. 70–73.

- Histochemical characteristics of acetylcholinesterase in vascular nerves of the brain. *Motavkin P.A., Dovbysh T.V.* Arkh Anat Gistol Embriol. 1971; 61 (10). P. 91–97.

**1972**

- Dual effector innervation of the cerebral arteries. *Motavkin P.A., Dovbysh T.V.* Zh Nevropatol Psikhiatr Im. S.S. Korsakova. 1972; 72 (7). P. 1007–1011.

- Nervous apparatus of the human spinal ependyma during postnatal development. *Motavkin P.A., Bakhtinov A.P.* Arkh Anat Gistol Embriol. 1972; 62 (5). P. 26–32.

**1973**

- Cholinergic innervation of the human brain arteries. *Motavkin P.A., Osipova L.P.* Z Mikrosk Anat Forsch. 1973; 87 (3). P. 365–378.

- Cholinergic and adrenergic nerves in the extramedullary arteries of the spinal cord. *Motavkin P.A., Palashchenko L.D.* Acta Morphol Acad Sci Hung. 1973; 21 (3). P. 227–238.

- Postnatal development of human spinal cord ependymal innervation. *Motavkin P.A., Bakhtinov A.P.* Neurosci Behav Physiol. 1973; 6 (3). P. 253–259.

- Acetylcholinesterase in the nerves of the arteries and the pia mater of the spinal cord. *Motavkin P.A., Palashchenko L.D.* Arkh Anat Gistol Embriol. 1973; 65 (11). P. 72–78.

**1974**

- Histochemical characteristics of acetylcholinesterase and monoamine oxidase in rat superior sagittal sinus nerves in ontogenesis. *Motavkin P.A., Karedina V.S.* Arkh Anat Gistol Embriol. 1974; 66 (5). P. 5–10.

**1975**

- A comparative characteristic of effector innervation of cerebral arteries in mammals and humans. *Motavkin P.A., Vlasov G.S., Palashchenko L.D.* Acta Morphol Acad Sci Hung. 1975; 23 (2). P. 157–164.

**1976**

- Cholin- and adrenergic components of the vegetative innervation of the dura mater. *Motavkin P.A., Karedina V.S., Mukhina G.M.* Arkh Anat Gistol Embriol. 1976; 70 (1). P. 36–41.

- Effector innervation of melanophores of the arteries of the base of the brain. *Motavkin P.A.* Bull Exp Biol Med. 1976; 81 (2). P. 244–246.

- Histophysiological characteristics of the effector innervation of the arteries of the base of the brain during rat ontogenesis. *Motavkin P.A., Vlasov G.S.* Arkh Anat Gistol Embriol. 1976; 71 (7). P. 41–46.

**1977**

- Choline acetyltransferase in the neural plexus of the main artery of cats brain. *Motavkin P.A., Vlasov G.S., Lomakin A.V., Mukhina G.M.* Arkh Anat Gistol Embriol. 1977; 72 (1). P. 40–43.

- New type of axon in nerves of arteries in the base of vertebrate brains. *Motavkin P.A., Chertok V.M., Bozhko G.G.* Dokl Akad Nauk SSSR. 1977; 236 (3). P. 736–737.

- Effect of adrenomimetics and sympatholytics on the adrenergic neural fibers and mast cells of the dura mater. *Motavkin P.A., Karedina V.S., Mukhina G.M., Chertok V.M.* Arkh Anat Gistol Embriol. 1977; 72 (5). P. 26–32.

- Changes in the large granular vesicles in sympathetic nerve endings under the influence of several pharmacologic agents. *Motavkin P.A., Chertok V.M., Bozhko G.G.* Bull Exp Biol Med. 1977; 83 (6). P. 700–701.

**1978**

- Adrenergic and cholinergic components of the innervation of the arteries of the base of the bird brain. *Motavkin P.A., Markina-Palashchenko L.D., Selivanov A.I.* Arkh Anat Gistol Embriol. 1978; 75 (7). P. 46–51.

- Choline acetyltransferase in the nerve plexuses of the basilar artery of the cat brain. *Motavkin P.A., Vlasov G.S., Lomakin A.V., Mukhina G.M.* Arkh Anat Gistol Embriol. 1978; 74 (5). P. 32–35.

- Histochemistry and choline acetyltransferase in cat spinal cord and spinal ganglia. *Motavkin P.A., Okhotin V.E.* Arkh Anat Gistol Embriol. 1978; 75 (9). P. 52–56.

**1979**

- Nerve ultrastructure of the arteries of the brain stem. *Motavkin P.A., Chertok V.M.* Arkh Anat Gistol Embriol. 1979; 76 (1). P. 13–19.

- Effect of acetylcholine on the mast cells of the dura mater. *Motavkin P.A., Chertok V.M., Shulga S.D.* Bull Exp Biol Med. 1979; 87 (5). P. 489–491.

- Programmed monitoring in the teaching of histology and embryology. *Motavkin P.A.* Arkh Anat Gistol Embriol. 1979; 77 (10). P. 86–87.

**1980**

- Histochemistry of choline acetyltransferase in the spinal cord and spinal ganglia of the cat. *Motavkin P.A., Okhotin V.E.* Neurosci Behav Physiol. 1980; 10 (4). P. 307–310.

\* Приводится в соответствии с текстовой базой портала PubMed (www.pubmed.gov).

- Pontine cholinergic nuclei of the human brain. **Motavkin P.A., Okhotin V.E.** Arkh Anat Gistol Embriol. 1980; 79 (11). P. 23–28.
- 1981**
- Cholinergic neurons of the human midbrain. **Motavkin P.A., Okhotin V.E.** Arkh Anat Gistol Embriol. 1981; 80 (4). P. 5–11.
- Adrenergic innervation of the pial arteries of the human brain. **Motavkin P.A., Pigolkin Yu.I.** Arkh Anat Gistol Embriol. 1981; 81 (9). P. 45–49.
- 1982**
- Morphological studies of the regulatory mechanisms of intracerebral blood circulation. **Motavkin P.A., Chertok V.M., Pigolkin Yu.I.** Arkh Anat Gistol Embriol. 1982; 82 (6). P. 42–49.
- Age characteristics of the efferent innervation of the arteries of the human pia mater. **Pigolkin Yu.I., Chertok V.M., Motavkin P.A.** Arkh Anat Gistol Embriol. 1982; 83 (8). P. 14–23.
- Histochemical diagnosis of the neurons of cholinergic synaptic transmission. **Motavkin P.A., Okhotin V.E.** Bull Exp Biol Med. 1982; 94 (12). P. 89–90.
- 1983**
- Cholinergic neurons in the nuclear formations of the human fetal medulla oblongata. **Motavkin P.A., Okhotin V.E.** Arkh Anat Gistol Embriol. 1983; 84 (1). P. 24–31.
- Cholinergic and adrenergic innervation of human intracerebral arteries in ontogenesis. **Chertok V.M., Pigolkin Yu.I., Motavkin P.A.** Arkh Anat Gistol Embriol. 1983; 84 (2). P. 22–29.
- Dynamics of postmortem changes in the adrenergic nerve fibers of the cerebral arteries. **Motavkin P.A., Chertok V.M., Pigolkin Yu.I.** Bull Exp Biol Med. 1983; 95 (5). P. 96–98.
- 1984**
- Localization of choline acetyltransferase in human brain stem neurons. **Motavkin P.A., Okhotin V.E.** Bull Exp Biol Med. 1984; 97 (3). P. 373–375.
- Topography of cholinergic neurons in the brain stem of the human fetus. **Motavkin P.A., Okhotin V.E.** Arkh Anat Gistol Embriol. 1984; 87 (12). P. 12–20.
- 1985**
- Surface of the vascular plexuses of human cerebral ventricles. **Motavkin P.A., Selivanov A.I., Ivanenko M.G.** Arkh Anat Gistol Embriol. 1985; 88 (2). P. 23–28.
- Localization of biogenic monoamines in the dura mater of the rat brain. **Motavkin P.A., Karedina V.S., Kozhevnikova T.A.** Arkh Anat Gistol Embriol. 1985; 88 (5). P. 11–16.
- Small granule-containing cells of the central nervous system of the bivalve mollusk *Patinoplectin yessoensis* (Jay). **Motavkin P.A., Varaksin A.A.** Arkh Anat Gistol Embriol. 1985; 88 (6). P. 13–16.
- Age characteristics of the efferent innervation of the pia mater arteries in the human brain. **Pigolkin Yu.I., Chertok V.M., Motavkin P.A.** Neurosci Behav Physiol. 1985; 15 (4). P. 343–350.
- Adrenergic neuromuscular junctions in the cerebral arteries of birds. **Motavkin P.A., Bozhko G.G.** Arkh Anat Gistol Embriol. 1985; 89 (11). P. 26–34.
- 1986**
- Olfactory epithelium of marine fishes in scanning electron microscopy. **Doroshenko M.A., Motavkin P.A.** Acta Morphol Hung. 1986; 34 (3). P. 143–155.
- Surface structure of the olfactory organ of marine teleosts. **Doroshenko M.A., Motavkin P.A.** Arkh Anat Gistol Embriol. 1986; 91 (10). P. 38–47.
- 1987**
- Localization of the peptide Hydra morphogen in the pontine neurons of the human brain. **Varaksin A.A., Vinogradov V.A., Motavkin P.A., Zverkov I.V., Tishchenko V.A.** Arkh Anat Gistol Embriol. 1987; 93 (9). P. 34–36.
- 1988**
- Peptidergic and monoaminergic innervation of the gonads in the holothurian *Cucumaria japonica*. **Motavkin P.A., Voronova G.P., Khotimchenko Yu.S.** Arkh Anat Gistol Embriol. 1988; 94 (3). P. 78–85.
- Localization of alcohol and aldehyde dehydrogenases in the human spinal cord and brain. **Motavkin P.A., Okhotin V.E., Konovko O.O., Zimatkin S.M.** Arkh Anat Gistol Embriol. 1988; 95 (11). P. 32–38.
- 1989**
- Immunochemical identification of vasopressin in neurons and in granule-containing cells of the human cerebral blood vessels. **Motavkin P.A., Lomakin A.V., Pigolkin Yu.I.** Arkh Anat Gistol Embriol. 1989; 96 (5). P. 18–23.
- Biogenic monoamines of the brain and spinal cord pia mater in vertebrates. **Motavkin P.A., Pigolkin Yu.I., Lomakin A.V., Kreymer D.I.** Zh Evol Biokhim Fiziol. 1989; 25 (5). P. 572–577.
- Receptor glomeruli and their ultrastructural organization in the arteries and pia mater of the brain and spinal cord of humans. **Motavkin P.A., Lomakin A.V., Pigolkin Yu.I., Chertok V.M.** Arkh Anat Gistol Embriol. 1989; 97 (9). P. 14–19.
- 1990**
- The cholinergic function of the bipolar neurons of the human cerebral cortex. **Motavkin P.A., Okhotin V.E.** Tsitologiya. 1990; 32 (7). P. 691–694.
- Cholinergic pyramidal Betz's and Meynert's neurons in human cerebral cortex. **Motavkin P.A., Okhotin V.E., Sulimov G.Yu.** Zh Nevropatol Psikhiatr Im S.S. Korsakova. 1990; 90 (10). P. 14–16.
- Cholinergic innervation of the endocrine cells of the blood vessels of the human brain. **Motavkin P.A., Lomakin A.V., Pigolkin Yu.I.** Folia Morphol (Praha). 1990; 38 (3). P. 312–314.
- Catecholamines and indolalkylamines of the pia mater and spinal cord in vertebrates. **Motavkin P.A., Pigolkin Yu.I., Lomakin A.V., Deridovich I.I.** Folia Morphol (Praha). 1990; 38 (3). P. 315–320.
- Cholinergic innervation of vasopressin-containing cells of the blood vessels of the brain in man. **Lomakin A.V., Pigolkin Yu.I., Motavkin P.A.** Bull Exp Biol Med. 1990; 109 (1). P. 67–69.
- Localization of alcohol- and aldehyde dehydrogenase in the human spinal cord and brain. **Motavkin P.A., Okhotin V.E., Konovko O.O., Zimatkin S.M.** Neurosci Behav Physiol. 1990; 20 (1). P. 79–84.
- Leu-enkephalin localization in brain capillaries. **Lomakin A.V., Motavkin P.A.** Dokl Akad Nauk SSSR. 1990; 310 (5). P. 1263–1265.
- Vasopressin in tissue basophils of the dura mater of white rats. **Lomakin A.V., Kan G.A., Motavkin P.A.** Bull Exp Biol Med. 1990; 109 (6). P. 583–584.
- Immunochemical identification of vasopressin in neurons and granule-containing cells of blood vessels of the human brain. **Motavkin P.A., Lomakin A.V., Pigolkin Yu.I.** Neurosci Behav Physiol. 1990; 20 (4). P. 348–352.
- Localization of leu enkephalin in animal and human brain stem. **Motavkin P.A., Lomakin A.V.** Arkh Anat Gistol Embriol. 1990; 99 (7). P. 49–54.
- Cholinergic pyramidal neurons of the motor region of human neocortex. **Motavkin P.A., Okhotin V.E., Sulimov G.Yu.** Arkh Anat Gistol Embriol. 1990; 99 (8). P. 34–39.
- Receptor glomeruli and their ultrastructural organization in the arteries and pia mater of the human brain and spinal cord. **Motavkin P.A., Lomakin A.V., Pigolkin Yu.I., Chertok V.M.** Neurosci Behav Physiol. 1990; 20 (5). P. 471–475.
- Intraspinal organ in man. **Motavkin P.A., Bakhtinov A.P.** Arkh Anat Gistol Embriol. 1990; 99 (10). P. 5–19.
- 1992**
- The cholinergic reactivity of the tissue basophils in the dura mater of the brain of white rats. **Lomakin A.V., Kozhevnikova T.A., Motavkin P.A.** Fiziol Zh SSSR Im I.M. Sechenova. 1992; 78 (6). P. 33–38.
- 1993**
- Localization of aspartate aminotransferase in structures of a human sensory neuron. **Okhotin V.E., Kalinichenko S.G., Pigolkin Yu.I., Motavkin P.A.** Neurosci Behav Physiol. 1993; 23 (4). P. 364–370.
- 1995**
- Aspartate aminotransferase of the human cerebellar cortex. **Kalinichenko S.G., Okhotin V.E., Motavkin P.A.** Tsitologiya. 1995; 37 (9–10). P. 910–914.
- 1996**
- Neurosecretory activity and the dynamics of the lipid content in the CNS neurons in the bivalve mollusk, Gray's mussel (*Crenomytilus grayanus* Dunker). **Reunova O.V., Kalinina G.G., Motavkin P.A.** Morfologiya. 1996; 110 (4). P. 75–82.

- The neurochemical characteristics of the neurons in the human hippocampal formation. *Diuzen I.V., Okhotin V.E., Kalinichenko S.G., Motavkin P.A.* *Morfologiya*. 1996; 110 (6). P. 49–54.
  - 1997**
  - The monoaminergic innervation of the mediastinal pleura in human fetuses. *Motavkin P.A., Zuga M.V., Baranov V.F., Eliseeva E.V., Nevzorova V.A.* *Morfologiya*. 1997; 111 (1). P. 43–46.
  - NO-ergic function of the Lugaro and Golgi cells in the rabbit cerebellar cortex. *Kalinichenko S.G., Okhotin V.E., Motavkin P.A.* *Tsitologiya*. 1997; 39 (2–3). P. 159–163.
  - Neurosecretory activity and dynamics of the lipid content of CNS neurons in Gray's mussel, a bivalve mollusk. *Reunova O.V., Kalinina G.G., Motavkin P.A.* *Neurosci Behav Physiol*. 1997; 27 (5). P. 524–532.
  - 1998**
  - Neurochemical characteristics of neurons of the human hippocampal formation. *Diuzen I.V., Okhotin V.E., Kalinichenko S.G., Motavkin P.A.* *Neurosci Behav Physiol*. 1998; 28 (1). P. 94–100.
  - Cholinergic neurons of the human motor cortex. *Okhotin V.E., Kalinichenko S.G., Motavkin P.A.* *Morfologiya*. 1998; 113 (1). P. 29–33.
  - Nitroxidergic neurons in the white matter of the human hippocampal formation. *Diuzen I.V., Kalinichenko S.G., Oxotin V.E., Motavkin P.A.* *Morfologiya*. 1998; 113 (1). P. 47–51.
  - Activity of various energy metabolism enzymes in the rat placenta after treatment with acetone. *Kovaleva I.V., Motavkin P.A.* *Tsitologiya*. 1998; 40 (4). P. 313–316.
  - The morphological bases for the cholinoreactivity of the mast cells of the respiratory organs. *Zuga M.V., Motavkin P.A.* *Morfologiya*. 1998; 114 (4). P. 72–77.
  - Nitric oxide and its importance in the regulation of pulmonary function. *Motavkin P.A., Zuga M.V.* *Morfologiya*. 1998; 114 (5). P. 99–111.
  - 1999**
  - Nitric oxide synthetase in the injured sensory neuron. *Motavkin P.A., Shumatova T.A., Andreeva N.A., Baranov V.F.* *Bull Exp Biol Med*. 1999; 128 (10). P. 463–465.
  - Cholinergic neurons in the motor areas of the human cerebral cortex. *Okhotin V.E., Kalinichenko S.G., Motavkin P.A.* *Neurosci Behav Physiol*. 1999; 29 (2). P. 227–231.
  - Nitric oxidergic function of chromaffin cells of respiratory organs. *Andreeva N.A., Shumatova T.A., Motavkin P.A.* *Bull Exp Biol Med*. 1999; 127 (8). P. 238–240.
  - 2000**
  - Nitric oxide production by normal and injured neurons of Nodose ganglion and Nucleus dorsalis of Vagus nerve. *Motavkin P.A., Shumatova T.A., Andreeva N.A., Tikhansky S.N.* *Tsitologiya*. 2000; 42 (2). P. 170–175.
  - Nitroxidergic neurons in respiratory organs. *Andreeva N.A., Shumatova T.A., Motavkin P.A.* *Bull Exp Biol Med*. 2000; 129 (2). P. 222–224.
  - Nitric oxidergic neurons of the respiratory organs. *Motavkin P.A., Andreeva N.A., Shumatova T.A.* *Morfologiya*. 2000; 117 (1). P. 10–13.
  - 2001**
  - Dynamics of NADPH-diaphorase activity in raphe neurons during chronic treatment with opiates. *Dyuizen I.V., Motavkin P.A., Shorin V.V.* *Bull Exp Biol Med*. 2001; 132 (3). P. 918–920.
  - 2002**
  - Significance of nitric oxide function in development of cardiac hypertrophy under condition of experimental renal hypertension. *Tishchenko O.V., Eliseeva E.V., Motavkin P.A.* *Tsitologiya*. 2002; 44 (3). P. 263–269.
  - Nitric oxide formation by chromaffinocytes of respiratory system and its importance for catecholamine exocytosis. *Motavkin P.A., Andreeva N.A., Eliseeva E.V.* *Morfologiya*. 2002; 121 (1). P. 80–83.
  - Nitric oxide synthase in neurons of the vagal nucleus dorsalis and ganglion nodosum and its changes following acetylcholine inhalation in the norm and in experimental bronchial asthma. *Eliseeva E.V., Romanova N.E., Baranov V.F., Motavkin P.A.* *Morfologiya*. 2002; 122 (4). P. 32–36. Russian.
  - 2003**
  - Ethanol-oxidizing and NO-synthesizing enzymes in monoaminergic nuclei of human brain. *Konovko O.O., Dyuzhen I.V., Motavkin P.A.* *Bull Exp Biol Med*. 2003; 136 (2). P. 202–205.
  - 2004**
  - Nitric oxide synthase in neurons in the nucleus dorsalis and ganglion nodosum of the vagus nerve and changes during inhalation of acetylcholine in normal conditions and in experimental bronchial asthma. *Eliseeva E.V., Romanova N.E., Baranov V.F., Motavkin P.A.* *Neurosci Behav Physiol*. 2004; 34 (1). P. 73–78.
  - Induction of NO-synthase and acetaldehyde dehydrogenase in neurons of human cerebellar cortex during chronic alcohol intoxication. *Konovko O.O., Morozov Y.E., Kalinichenko S.G., Dyuzhen I.V., Motavkin P.A.* *Bull Exp Biol Med*. 2004; 137 (2). P. 211–214.
  - Induction of NO-synthase and glial fibrillary acidic protein in astrocytes of the temporal cortex in rats with audiogenic epileptiform reaction. *Kalinichenko S.G., Dudina Yu.V., Dyuzhen I.V., Motavkin P.A.* *Morfologiya*. 2004; 125 (3). P. 68–73.
  - 2005**
  - Induction of NO-synthase and glial acidic fibrillary protein in astrocytes in the temporal cortex of the rat with audiogenic epileptiform reactions. *Kalinichenko S.G., Dudina Yu.V., Dyuzhen I.V., Motavkin P.A.* *Neurosci Behav Physiol*. 2005; 35 (6). P. 629–634.
  - 2006**
  - Role of nitric oxide in apoptosis of retinal neurons in human fetuses. *Matveeva N.Yu., Kalinichenko S.G., Pushchin I.I., Motavkin P.A.* *Morfologiya*. 2006; 129 (1). P. 42–49.
  - 2007**
  - Neurogliaform cells: neurochemistry, spatial arrangement, and their role in the neocortical inhibitory system. *Kalinichenko S.G., Dudina Yu.V., Motavkin P.A.* *Tsitologiya*. 2006; 48 (6). P. 508–514.
  - The role of nitric oxide in the apoptosis of neurons in the retina of the human fetal eye. *Matveeva N.Yu., Kalinichenko S.G., Pushchin I.I., Motavkin P.A.* *Neurosci Behav Physiol*. 2007; 37 (2). P. 111–118.
  - Innervation of the brain: what is innervated by what. *Motavkin P.A.* *Morfologiya*. 2007; 131 (1). P. 82–84.
  - The 50<sup>th</sup> anniversary of the Histology Department of the Vladivostok Medical University. *Motavkin P.A.* *Morfologiya*. 2007; 132 (6). P. 88–92.
- Портал PubMed ([www.pubmed.gov](http://www.pubmed.gov)) – онлайн-овая текстовая база данных медицинских и биологических публикаций, сформированная на основе раздела «биотехнология» Национальной медицинской библиотеки США (US National Library of Medicine National Institutes of Health), содержит более 20 млн резюме, статей и ссылок на оригинальные научные источники. PubMed, представленная в Интернете с января 1996 г., является бесплатной версией базы данных MEDLINE, которая размещает источники, начиная с 1949 г. В MEDLINE собраны статьи из медицинских журналов и других периодических изданий, включенные в крупнейшие международные базы данных (Scopus, Web of Science и др.). Около 9000 описаний вводятся в MEDLINE еженедельно, более 500000 – в год.
